

Creators of ambiance

CALEX CATALOGUE #25 - OCTOBER 2018

Behind the brand

OUR HISTORY

Electro Cirkel B.V. was founded in 1970 by the van Soelen brothers. At that time, the core business was to sell electrical products to ship chandlers, manufacturers and offshore. In 1987 Electro Cirkel merged with 'California Export' (Calex), a company specialized in navigation lamps for sea- and inland vessels. In the following years the product range expanded and production was transferred to the Far East.

In time, Rudolf and Angeniek van Soelen took over the family shares. Under their prestige the core business of Electro Cirkel has shifted into the retail market. Hereby building up Calex as a steady brand of light sources sold throughout Europe.

UNIQUE RANGE OF PRODUCTS

Our main focus is on our own consumer brand, Calex. In the past years the range of products has been substantially extended with innovative and trendsetting LED lighting. Calex can provide the correct light source for every ambiance an individual or situation would require. We aim to stimulate and inspire our customers with our lighting collection.

DECISIVE AND FLEXIBLE

Electro Cirkel works in close cooperation with several manufacturers in China. This ensures that we can predict and react swiftly to new trends.

In April 2016 Electro Cirkel opened a Purchase office in Zhejiang, China for assistance in sourcing, manufacturing and improving the quality of Calex consumer lighting. This office is powered by a team of 17 motivated men and women who have detailed knowledge of the local market. Electro Cirkel China has access to an extensive test center, where new products can be tested in fine detail.

CALEX ON TOUR

Since 2008, Calex has been a leading exhibitor at many national and international fairs, including the largest European exhibition of its kind: Frankfurt's Light & Building Fair, which is held every other year in Frankfurt, Germany.

In 2017, for the first time, Calex was present at one of the largest consumer oriented home decoration fairs in Amsterdam, The Netherlands. Up until now, Calex has succeeded in bringing innovative originality to every fair.

WAREHOUSE

With stocks located in two locations we can provide directly for both smaller and larger orders. The warehouse located in the headquarters fits up to 6.000 pallets. Our newest warehouse even has room for 7.500 pallets.

WE LOVE THE WORLD WE LIVE IN

We cherish the environment and take issues of environmental pollution, waste and energy consumption very seriously. Therefore, we recycle both packing materials as well as electronic products at the end of their lifespan. By doing this, we contribute to preventing hazardous materials from spreading into the environment.

DEVELOPMENTS

Electro Cirkel will implement the necessary requirements for better ecodesigns of non-household lamps. This process will effect the energy inefficient lamps, such as halogen lamps. Therefore, our goal is to achieve maximum energy efficiency by continually increasing our range of LED lamps and putting a smile on your face by saving you money on energy when you use any CALEX product.

HOW TO REQUEST FOR QUOTATION AND HOW TO ORDER

If you need technical data of our products you are welcome to download the concerning datasheets from our website for free. Regarding requests for quotation, orders and inquiries you can contact us for an appointment.

SYMBOLS

Symbols are used to show specifications and special features, for example:

CORD SETS

CALEX

This fixture accepts the following energy labels:

The fixture is sold without lamp

874/2012

This label applies to our cord sets.

Calex Packaging Range

Over time we have created recognizable packaging for our Calex products. Each concept matches the products inside perfectly and displays them at their best.

LUXURY BOX WITH MAGNETS EXCLUSIVE SERIES

The packaging for this range sends out a luxurious vibe that can also function as a gift box. The magnets on the side make sure the package can't open unplanned and add to the luxurious look and feel. The foam inside protects the uniquely shaped contents from breakage or other possible damage.

CARTON SMART HOME

The packaging for this series is made of laminated carton. The contents of the packaging are protected by sized and folded carton. The creative and colorful icons on the sides of the packaging show customers features, but also with what other products this item can be used best.

TRANSPARENT BOX VARIOUS LED FILAMENT SERIES

To increase visibility of the bulbs and their features like fitting, coating and size, transparent material is used. The bulbs stay in place with transparent, snug fit, placeholders. This to ensure the bulbs don't move around and can't get damaged. The gold elements in this range of packaging show the difference between our SMD and LED Filament series.

CRAFT PACKAGING
**XXL SERIES &
 GIANT ORIGINAL SERIES**

The craft material and playful design of these boxes match the trendy and artistic bulbs inside. The bulb cut out and the inspirational text add ambiance to the packaging and show what customers can expect when they purchase these lamps. The foam protects the bulbs during transport to its final destination.

TRANSPARENT WITH
 CRAFT INSERT
CALEX CREATIONS

Our Creations packaging is a creative combination of printed carton and transparent material. It shows how the products can be used as well as features like size, shape and color. The design is simple, yet efficient and matches the look and feel of our craft packaging for the XXL & Giant decorative series.

TRANSPARENT BOX
SMD SERIES

The transparent material used for this range increases visibility of the bulbs and features inside. The bulbs can't move around due to the transparent placeholders in the top and bottom of the package. The green elements in this range of packaging is what sets it apart from the LED Filament packaging range.

DECORATIVE | EXCLUSIVE SERIES

Our Exclusive series is something completely different from all our other decorative series. These unique showpieces are meant to be seen. We designed them specially to upgrade interiors with beautiful lighting that allows finesse and style to come together. Our exclusive lamps come with a luxurious gift box.

new

DECORATIVE | 3 STEP DIM SERIES

For these models a dimmer is not required, yet they are dimmable! They are equipped with the latest technology so you can easily adjust the light intensity with one or more clicks on the same light button. You can choose 3 modes, full, 50% and 12,5%, hence the name; 3 step.

SPHERICAL LAMP

240V, P45, E27

These lamps work with existing switches.

Each click dims the lamp by one step. Each decrease in lumen means less power consumption. The fourth click switches the lamp off.

- Step 1: 550 Lumen - 5,5 W
- Step 2: 320 Lumen - 2,8 W
- Step 3: 130 Lumen - 1,3 W

- Control lights and appliances with (max. 6) smartphones/tablets
- Operate with the Calex app designed for iPad, iPhone and Android tablet or smartphone
- Monitors homes with sensors and sends push alert notifications to a smartphone/tablet
- Program timers for lights/devices (including sunrise/sunset recognition)
- Set up different scenarios to automate lights/devices
- Secure communication with AES encryption and SSL
- Input RJ11-connector, RJ45-connector, Micro USC-B, USB type A
- Indoor transmission range up to 70 metres
- Outdoor transmission range up to 120 metres
- Compatible with Calex smart home products with a product name starting with an A (e.g. AYCT-102)

ACCESSORIES | DIMMERS AND BATTERIES

The products in this category can be used to dim lights down low using specially tested LED dimmers and to supply energy on the go.

new

H: 68 mm
B: 68 mm

BUILD-IN WALL DIMMER FOR LED
TRAILING EDGE DIMMER ('RC'), 230V, 50HZ

This led wall dimmer (3-150W/VA) is suitable for dimming of the following light sources:
 > dimmable (retrofit) led lamp (230V, max 70W);
 > 12V halogen lamp combined with a dimmable electronic transformer (120W max);
 > low voltage led lamp combined with a dimmable led driver (120W max).

CHARACTERISTICS

- > trailing edge dimmer ('RC'), 230V/50Hz
- > dimmer has a soft start that prevents peak currents which can negatively influence the lifetime of led lamp
- > due to the internal alternating push switch, this dimmer can control a (led) lamp in combination with a normal alternating switch (multiway switching)

Article number	Description	EAN 13 code	Quantity inner / outer
176372	Build-in wall dimmer for led	8712879137382	5 / 20
176382	Build-in Duo wall dimmer for led	8712879142003	5 / 100

OPERATION OF THE DIMMER:

After safe installation, push the turn/push knob **1** to switch on the lamp. Turn the knob **1** to minimum value, entirely counter clockwise.

By means of the selection switch **2** the desired minimum brightness level (lowest dimming level) can be set (profile value 1, 2, 3 or 4).

By turning the knob **1** fully clockwise, the maximum brightness level of the lamp is demonstrated.

Also the maximum brightness level depends on the applied profile. In case of a stable light of the (led) lamp over the dimming range (from minimum to maximum brightness level) and if the dimming range is satisfying, the right profile was found for the applied (led) lamp.

SINGLE WHITE COVER WITH KNOB
FLUSH MOUNTING 230V (LED 70W) - (GLS 150W)

HALOGEN SERIES

These lamps share the same traditional shape as their incandescent counterparts, but produce a slightly brighter light while being a lot more energy efficient and fully dimmable.
